GN container 1/3 204 perforated

The stainless steel Gastronorm operating system.

The robust, perforated GN container – ideal for use in the sink (e.g. cleaning fruit and vegetables), for cooking in a combi steamer or for insertion in closed GN containers (depending on the version) – in virtually any size and depth, completely compatible in all GN systems and products.

The GN container takes on a function dependent on the process step through the combination with the GN lid range. From highly functional options, such as the watertight press-in lid for completely safe storage and transport through to the flat and press-in lid for hygienic protection. Also available with stackable hinged handles to enable easy and space-saving insertion, removal and carrying.

For universal applications – preparations in waterstation® cubic sinks, space-saving cooling in a gastropolar® system refrigerator, temperature-resistant transportation in a thermoport®, as well as presenting and serving in buffet solutions and mobile appliances.

TECHNICAL SPECIFICATIONS

GN container 1/3 204 perforated

TECHNICAL SPECIFICATIONS

BENEFITS

Stainless steel, completely food-safe, odour-free, anti-bacterial and hygienic.

With tight corner radii for greater stability and volume.

High-quality stacking shoulder for perfect stacking and air circulation.

A space gain of approx. 30% compared to round containers thanks to the square organisation system.

Optimum insertion in the version with stackable hinged handles.

Strong, robust and dishwasher-safe.
