Data sheet

Exchange dispenser - unheated

The universal crockery dispenser.

The exchange dispenser for the interim storage and transport of any crockery items. With a grid platform that can be sub-divided as required, with 6 fixing rods, for the perfect centring of crockery items, suitable for common plate sizes as well as for crockery with various geometries. The spring force can be easily adjusted by hand according to the crockery weight.

As an additional accessory either with the corresponding polycarbonate lid hood or the single-walled stainless steel lid hood. Also extendible with complete all-round impact protection for extra robustness. Also with CNS castors on request.
