Data sheet

thermoport® K 100 hybrid passive-black

The unheated toploader transport box made of plastic with a passive cold and hot zone.

The stackable toploader is used for the safe transport of food in a GN system and for keeping the food hot and cold, whereby the interior can be separated by an insulated drawer. The insulated drawer is stowed away practically on the face side of the food transport container and is ready to use at all times. The food containers are simply stacked in the thermoport® and can be configured with different container sizes and combinations depending on the requirement (GN 1/1, 2/3, 1/2, 1/3, 1/4, 2/8, 2/4, 1/6, 1/9). Practical for dividing into smaller food portions or for a meal with many components. For the best food quality and complete transport safety.

Space-efficient configuration with GN containers in combination with the transport-safe, watertight press-in lid or in a vacuum with the vaculid® lid. The interior can be divided into a hot and cold zone thanks to the insulated drawer.

Rieber thermoport® made of plastic and stainless steel can be stacked together and placed on the transport or serving trolleys – for slip-resistant and safe transport.

Retrofittable with a CHECK sensor for seamless and automatic temperature documentation during transport. Clear identification and connection to the CHECK CLOUD are possible with the QR code.

TECHNICAL SPECIFICATIONS

thermoport® K 100 hybrid passive-black

TECHNICAL SPECIFICATIONS

Dimensions	700 x 425 x 368 mm
Material	polypropylene
Weight	7,3 kg
Capacity with GN	26 L
Ambient temperature	-20°C to +100°C
Dishwasher safe	until 90 °C

Order number **85 02 03 54**

BENEFITS

Lightweight, robust and pore-free plastic, double-walled and tightly welded.

Well insulated, low loss of heat/cold.

The interior can be separated by an insulated drawer.

Ergonomic, hinged handles and high-quality snap locks.

Indents on the interior sides make it easy to grip stacked GN containers of any size or depth.

Exceptional loading versatility as the containers can be stacked compactly – no wastage of space and no gaps.

Replaceable floor protection rails.

Dishwasher-safe up to +90°C.
