## thermoport<sup>®</sup> CNS 1000 unheated

**The neutral food transport box.**

The stackable frontloader is used for the safe transport of food in a GN system and for keeping the food hot and cold. For the best food quality and complete transport safety.

Space-efficient configuration with GN containers and GN thermoplates<sup>®</sup> in combination with the transport-safe, watertight press-in lid or in a vacuum with the vaculid<sup>®</sup> lid. GN 1/1 heating or cooling pellets can be inserted accordingly for passively keeping food hot and cold. Hot and cold food can be insulated separately during transport thanks to the insulated divider.

Rieber thermoport<sup>®</sup> made of plastic and stainless steel can be stacked together and placed on the transport or serving trolleys – for slip-resistant and safe transport.

Retrofittable with a CHECK sensor for seamless and automatic temperature documentation during transport. Clear identification and connection to the CHECK CLOUD are possible with the QR code.

## TECHNICAL SPECIFICATIONS

thermoport® CNS 1000 unheated

## TECHNICAL SPECIFICATIONS

Dimensions	410 x 665 x 470 mm
Material	stainless steel 1.4301 (CNS)
Weight	19 kg
Capacity with GN	38 L
Support rails	8
Rail distance	36 mm
Ambient temperature	-20°C to +100°C
GN-Norm	GN 1/1

**Order number** **85 01 04 04**

## BENEFITS

Rustproof, high-quality, hygienic stainless steel (interior and exterior).

Interior tightly welded with seamlessly deep-drawn support rails in hygienic design H3.

Door with an all-round, replaceable seal and suitable for use with foodstuffs.

Double-walled insulation, low loss of heat/cold.

Uniform heat distribution, even when fully loaded.

Insulated, recessed, hinged handles and high-quality spring door lock.

Suitable for outdoor use.

Replaceable stacking and floor protection rails.

Removable door seal, quick and easy cleaning.

Suitable for cleaning with a high-pressure cleaner.
