

Data sheet

Bever. container Ther-mi K 12l unheated

The neutral beverage transport box.

More Info

The top loader is used to safely transport and dispense hot or chilled drinks. With integrated deep-drawn stainless steel inner container, which is absolutely securely sealed by the watertight plug-in lid with robust sealing lip. The plastic lid of the drinks container has an integrated recess for two separate ladles (ladles are not included).

A serving trolley can be used to easily move the Thermi beverage container to the serving location. In combination with thermoport® made of plastic and stainless steel – for an additional mobile food transport solution.
