

Data sheet

Beverage cont. Thermi K 12l black

The neutral beverage transport box.

More Info

The toploader is used for the safe transport and serving of hot or chilled beverages. With an integrated deep-drawn stainless steel inner container, which is absolutely water tight with a watertight press-in lid with a robust sealing lip. The plastic lid of the beverage container with an integrated cut-out for two separate skimmers (not included in the delivery).

A serving trolley can be used to easily move the Thermi beverage container to the serving location. In combination with thermoport® made of plastic and stainless steel – for an additional mobile food transport solution.
