varithek® 400-gp-5000-SP-i (2,5)

The griddle induction module.

The acs® setting or tabletop module opens up a balanced, coherent and ergonomic overall picture with its new design. The particularly high-performance grill plate made of unique SWISS-PLY multilayer material combines aluminum in the core, with the hygienic advantages of stainless steel and up to 10x better conductivity. Increased energy efficiency thanks to the latest induction technology, which is fully effective for the grill area. The device automatically switches to energy-saving mode (ECO Mode) when power is reduced and heats up again to the preset temperature when power is removed. The LED button (ECO boost on) on the control panel offers the possibility of manual heating when the power is low. The nano-treated surface also guarantees non-stick effect and optimally even grilling results, with infinitely variable temperature for gently keeping warm, frying to grilling. In addition, with safety temperature limit.

For use as a table-top variant in combination with additional splash guard, for a clean and hygienic work surface (not necessary when used in acs®). By extension with the adjustable foot extension set, an associated deeper GN 2/4 (40 mm) grease drip tray can be integrated, allowing longer periods of use without changing the grease drip tray.

All varithek® modules are normed and can therefore be flexibly combined and exchanged for precise fitting in acs® front cooking stations or as table-top units on any commercially available worktop.

TECHNICAL SPECIFICATIONS

varithek® 400-gp-5000-SP-i (2,5)

TECHNICAL SPECIFICATIONS

Dimensions	400 x 662 x 212 mm
Material	stainless steel 1.4301 (CNS)
Weight	35 kg
Connected load	5.000 W
Rated voltage	3N AC 400 V 50/60 Hz
Plug type	CEE-Plug 400V/16A
Cable length	2500 mm
Protection class	IPX4
Work surface	SWISS-PLY
Field version	full-surface

Order number **91 03 01 71**

BENEFITS

Stainless steel body, hygienic, high quality satin finish.

Grill plate made of SWISS-PLY multilayer material with high edge.

Automatic energy-saving mode (ECO Mode) as well as fast heating due to the ECO boost on.

Immediate heat transfer and even heat distribution.

On/off rotary knob with power signal light.

Sturdy, foldable aluminum handle for uncomplicated and easy handling.

Non-slip due to 4 support feet on the bottom of the housing.

Grease drain in the corner, closable by plug.

Grill plate easy to clean with polyamide scraper.

Removable grease drip tray at the bottom, for quick emptying.
