Data sheet

thermoport® K 1000 unheated+GN black

The neutral food transport box.

The stackable toploader is used for the safe transport of food in a GN system and for keeping the food hot and cold. For the best food quality and complete transport safety.

Space-efficient configuration with $4 \times 6N = 1/1 = 1/100$ mm deep with drop handles, in combination with matching flat lids with handle cut-outs. Hot and cold food can be insulated separately during transport thanks to the insulated divider.

Rieber thermoport® made of plastic and stainless steel can be stacked together and placed on the transport or serving trolleys – for slip-resistant and safe transport.

Retrofittable with a CHECK sensor for seamless and automatic temperature documentation during transport. Clear identification and connection to the CHECK CLOUD are possible with the QR code.

TECHNICAL SPECIFICATIONS thermoport® K 1000 unheated+GN black

TECHNICAL SPECIFICATIONS

Order number	85 02 04 66
Dishwasher safe	until 90 °C
Ambient temperature	-20°C to +100°C
Capacity with GN	52 L
Weight	20,708 kg
Material	polypropylene
Dimensions	610 x 435 x 561 mm

BENEFITS

Lightweight, robust and pore-free plastic, double-walled and tightly welded.

Well insulated, low loss of heat/cold.

Ergonomic, hinged handles and high-quality snap locks.

Replaceable floor protection rails.

Dishwasher-safe up to +90°C.
