

Data sheet

Induc.cooking kettle SWISS|PLY 86l, army

Energy-saving & mobile induction cooking kettle with SWISS|PLY multilayer base.

More Info

The energy-efficient induction cooking kettle can be used universally for cooking, boiling, roasting, steaming and deep-frying. In addition, the kettle is mobile and easy to operate with steplessly adjustable power levels 1-11 and a capacity of 86 litres.

The difference in terms of energy efficiency compared to conventional cooking kettles lies in the inductively heated base plate made of SWISS|PLY multi-layer material. This conducts the heat particularly quickly and evenly, with an optimum energy utilisation of 16 amps and 10 kW.

In only approx. 50 minutes, 65 litres of water can be heated up to +98 °C and in approx. 4 minutes the multi-layer plate reaches a grilling temperature of +250 °C.

The well-insulated lid is equipped with an overpressure opening and a snap-on locking catch and integrated swivel joint, fixable for an opening angle of approx. 70°, for safe operation.

In the energy-efficient induction cooking kettle, food can be prepared in large containers directly in the kettle base with 86 litre capacity, but also easily in smaller containers with insertable GN containers with SWISS|PLY multi-layer base or GN-thermo-plates®, for less cleaning as the kettle itself remains clean.

TECHNICAL SPECIFICATIONS

Induc.cooking kettle SWISS|PLY 86l, army

TECHNICAL SPECIFICATIONS

Material	stainless steel 1.4301
Dimensions	1144 x 700 x 581 mm
Capacity	86 L
Weight	90 kg
Connected load	10 kW
Rated voltage	3N AC 400 V 50/60 Hz
Plug type	CEE-Plug 400V/16A
Cable length	2500 mm
Protection class	IPX4
Work surface	SWISS-PLY

Order number **99 03 02 14**

BENEFITS

Rustproof, high-quality, hygienic stainless steel (inside & outside), inner kettle seamlessly deep-drawn and welded.

Highly efficient & fast-conducting SWISS|PLY multi-layer base for energy-saving & even heat distribution.

Double-walled insulated lid reliably sealed with all-round robust rubber seal.

Two Teflon drain plugs for grilling and cooking, with absolute safety thanks to integrated overheating protection of the induction coil.

Stable carrying handles at the front & back, as well as insulated handle and lid vent.

Suitable for outdoor use, splash-proof (IPX4).

With drain pipe bend for proper cleaning, quick & easy to remove without tools.
