varithek[®] 1/1-hp-SP (2,5)

The hybrid cold/hot module.

The table-top or slide-in module with an electronically controllable, energy-saving cooling/warming plate (full-surface) is used for cooling food and keeping it cold/hot in a GN system – for maximum flexibility in any serving situation.

This provides significant energy savings in use through the direct contact heat / cold and the plate's unique SWISS-PLY multi-layer material. The material combines aluminium in the core with conductivity (hot/cold) 10 times better than pure stainless steel and the hygienic advantages of stainless steel. This enables the fast and easy switching of the plate from refrigeration to heating mode. The digital control can be used to set the desired target temperature for the integrated cooling ducts or for heating and to maintain a constant energy supply for the desired temperature to ensure perfect quality even after a prolonged period of time.

The heat / cold can be stored even more efficiently in combination with the thermo-plates[®] GN cooking pot, also made of SWISS-PLY multi-layer material. The watertight press-in lid and the stylish cooking and buffet lids (buffet lid for the table-top variant) offer the matching lid variants for keeping food hot/cold and for hygienic protection when serving.

All GN 1/1 varithek[®] modules are standardised and can therefore be flexibly combined and interchanged, for precise insertion in the AST/EST system modules or in the varithek[®] GN port. Also available on request as a built-in version for stationary use.

TECHNICAL SPECIFICATIONS

varithek® 1/1-hp-SP (2,5)

TECHNICAL SPECIFICATIONS

Dimensions	325 x 620 x 141 mm
Material	stainless steel 1.4301 (CNS)
Weight	14 kg
Connected load	500 W
Rated voltage	1N AC 230 V 50/60 Hz
Plug type	Safety switch (type F)
Cable length	2.500 mm
Heating Area	max. +120°C
Refrigeration range	-7°C to +10°C
Protection class	IPX4
Work surface	SWISS-PLY
Field version	full-surface
Refrigerant	Eisfink D2

Order number 91 18 01 14

BENEFITS

Housing made of stainless steel, with a rustproof, hygienic, high-quality brushed matt finish.

Flush-mounted hybrid plate made of SWISS-PLY multi-layer material.

Deep-drawn support rails on the sides for system modules compatibility (AST, EST and GN port).

Immediate temperature transition and uniform temperature distribution.

Compatible with GN sizes, a space gain of approx. 30% compared to round containers.

Can be set down thanks to the 4 plastic feet on the bottom of the housing.

Hybrid plate is easy to clean with a polyamide scraper.

Splash-proof (IPX4).
