## GNONE<sup>®</sup> container 1/2 065

**The easy to unstack stainless steel Gastronorm operating system.**

The robust GN container – with “GN-ONE stacking lugs” for easy unstacking & separation of the GN standard container system. The physical optimisation of the standard GN container makes it practical and efficient to handle, both manually and with machines/automatically.

Ideal for the hygienic and standardised storage, holding, transport and serving of food. With practical knobbles on all 4 corners, available in size GN 1/1, 2/3, 1/2 and 1/3 and depths 55, 65, 100, 150 and 200 mm, with or without drop handles, completely compatible in all GN systems and products.

The GN container takes on a function dependent on the process step through the combination with the GN lid range. From highly functional options, such as the water-tight press-in lid for completely safe storage and transport, the vaculid<sup>®</sup> lid for vacuum sealing through to the flat and press-in lid for hygienic protection.

Also available with recessed drop handles to enable easy and space-saving insertion, removal and carrying. The versions from a depth of 55 mm have a high, well shaped offset stacking shoulder, which enables tight stacking and easy unstacking and also defines the maximum filling height\*\* so that the lid can be sealed neatly and securely on the container.

For universal applications – preparations in waterstation<sup>®</sup> cubic sinks, space-saving cooling in a gastropolar<sup>®</sup> system refrigerator, temperature-resistant transportation in a thermoport<sup>®</sup>, as well as presenting and serving in buffet solutions and mobile appliances.

## TECHNICAL SPECIFICATIONS

GNONE® container 1/2 065

## TECHNICAL SPECIFICATIONS

Dimensions	325 x 265 x 65 mm
Material	stainless steel 1.4301 (CNS)
Volume	3,3 L
Weight	0,6 kg

**Order number** **84 01 01 22**

## BENEFITS

Stainless steel, completely food-safe, odour-free, anti-bacterial and hygienic.

With tight corner radii for greater stability and volume.

High-quality stacking shoulder for perfect stacking and air circulation.

With embossed stacking lugs on the outside on all 4 corners for easy unstacking and separation.

A space gain of approx. 30% compared to round containers thanks to the square organisation system.

Optimal insertion in the version with retractable drop handles.

Sturdy, robust and dishwasher-safe.
