## GN container 1/2 040

**The stainless steel Gastronorm operating system.**

The robust GN container – ideal for the hygienic and standardised storage, holding, transportation and serving of food – in almost any size and depth, completely compatible with all GN systems and products.

The GN container takes on a function dependent on the process step through the combination with the GN lid range. From highly functional options, such as the water-tight press-in lid for completely safe storage and transport, the vaculid® lid for vacuum sealing through to the flat and press-in lid for hygienic protection.

Also available with recessed drop handles to enable easy and space-saving insertion, removal and carrying. The versions from a depth of 55 mm have a high, well shaped offset stacking shoulder, which enables tight stacking and easy unstacking and also defines the maximum filling height\*\* so that the lid can be sealed neatly and securely on the container.

For universal applications – preparations in waterstation® cubic sinks, space-saving cooling in a gastropolar® system refrigerator, temperature-resistant transportation in a thermoport®, as well as presenting and serving in buffet solutions and mobile appliances.

## TECHNICAL SPECIFICATIONS

GN container 1/2 040

## TECHNICAL SPECIFICATIONS

Dimensions	325 x 265 x 40 mm
Material	stainless steel 1.4301 (CNS)
Volume	1,7 L
Weight	0,444 kg

**Order number** **84 01 01 23**

## BENEFITS

Stainless steel, completely food-safe, odour-free, anti-bacterial and hygienic.

With tight corner radii for greater stability and volume.

High-quality stacking shoulder for perfect stacking and air circulation.

A space gain of approx. 30% compared to round containers thanks to the square organisation system.

Optimal insertion in the version with retractable drop handles.

Sturdy, robust and dishwasher-safe.
