Data sheet

thermoport® K 1000 unheated - black

The neutral food transport box.

The stackable frontloader is used for the safe transport of food in a GN system and for keeping the food hot and cold. For the best food quality and complete transport safety.

Space-efficient configuration with GN containers and GN thermoplates® in combination with the transport-safe, watertight press-in lid or in a vacuum with the vaculid® lid. GN 1/1 heating or cooling pellets can be inserted accordingly for passively keeping food hot and cold. Hot and cold food can be insulated separately during transport thanks to the insulated divider.

Rieber thermoport® made of plastic and stainless steel can be stacked together and placed on the transport or serving trolleys – for slip-resistant and safe transport.

Retrofittable with a CHECK sensor for seamless and automatic temperature documentation during transport. Clear identification and connection to the CHECK CLOUD are possible with the QR code.

TECHNICAL SPECIFICATIONS

thermoport® K 1000 unheated - black

TECHNICAL SPECIFICATIONS

Dimensions	610 x 435 x 561 mm
Material	polypropylene
Weight	12 kg
Capacity with GN	52 L
Support rails	12
Distance betw. sup-ports	36 mm
Order number	85 02 04 12

BENEFITS

Lightweight, robust and pore-free plastic, double-walled and tightly welded.

Well insulated, low loss of heat/cold.

Ergonomic, hinged handles and high-quality snap locks.

Replaceable floor protection rails.

With a removable door for quick and easy cleaning.

Dishwasher-safe up to +90°C.
