Data sheet

Bever. container Ther- mi CNS 7l unheated

The neutral beverage transport box.

The toploder is used for the safe transport and serving of hot or chilled beverages. With an integrated deep-drawn stainless steel inner container, which is absolutely water tight with a watertight press-in lid with a robust sealing lip.

A serving trolley can be used to easily move the Thermi beverage container to the serving location. In combination with thermoport® made of plastic and stainless steel – for an additional mobile food transport solution.

TECHNICAL SPECIFICATIONS

Bever. container Thermi CNS 7l unheated

TECHNICAL SPECIFICATIONS

	147 x 426 x 407 mm
Material	stainless steel 1.4301 (CNS)
