GNONE[®] container 1/1 200 4x QR

The easy to unstack stainless steel Gastronorm operating system.

The robust GN container – with “GN-ONE stacking lugs” for easy unstacking & separation of the GN standard container system. The physical optimisation of the standard GN container makes it practical and efficient to handle, both manually and with machines/automatically.

Ideal for the hygienic and standardised storage, holding, transport and serving of food. With practical knobbles on all 4 corners, available in size GN 1/1, 2/3, 1/2 and 1/3 and depths 55, 65, 100, 150 and 200 mm, with or without drop handles, completely compatible in all GN systems and products.

The GN container takes on a function dependent on the process step through the combination with the GN lid range. From highly functional options, such as the water-tight press-in lid for completely safe storage and transport, the vaculid[®] lid for vacuum sealing through to the flat and press-in lid for hygienic protection.

Also available with recessed drop handles to enable easy and space-saving insertion, removal and carrying. The versions from a depth of 55 mm have a high, well shaped offset stacking shoulder, which enables tight stacking and easy unstacking and also defines the maximum filling height** so that the lid can be sealed neatly and securely on the container.

Laser-engraved QR codes on all four sides for identification and linking of physical products with digital services. This allows for seamless automated scanning from all sides, similar to a scanner bridge.

TECHNICAL SPECIFICATIONS

GNONE® container 1/1 200 4x QR

TECHNICAL SPECIFICATIONS

Dimensions	325 x 530 x 200 mm
Material	stainless steel 1.4301 (CNS)
Capacity	26 L
Weight	2,2 kg
Ambient temperature	-40°C to +280°C
Dishwasher safe	Yes
Material thickness	0,8 mm
GN-Norm	GN 1/1
GN depth	200 mm

Order number **84 01 14 01**

BENEFITS

High quality 18/10 stainless steel, rustproof, heat resistant, food safe, antibacterial & hygienic.

Highest dimensional stability in ovens/combi steamers, due to tightly designed corner & bottom radii, also more filling capacity.

Perfectly stackable due to well-defined stacking shoulder.

Optimum air circulation via special corner design.

GNONE® with 4 embossed corner stacking lugs without wedging for easy unstacking.

Standardized system in 1/1 basic size fits in and on all kitchen appliances (further divisions/doubles in other GN sizes).

Square arrangement system offers up to 30% space saving compared to round containers/pots.

Compatibility with versch. GN lid variants (storage, transport, cooking & serving).

Simplified, automated data capture from all sides.

Retrofittable QR code for digital returnable tracking.

Sturdy, durable & dishwasher safe.
